

our mission, your confidence

Experience

We have a 140-year history of sustained technical progress.

Expertise

Our 10,000 professionals, including more than 7,000 engineers and technicians apply their highly developed skills on a daily basis.

Proximity

Our doorstep approach ensures fast response times.

Independence

As a third-party organization, Apave always acts impartially and transparently.

We are completely independent of suppliers, manufacturers and other business partners.

and ITER, a long story

**SPECIAL
ITER
CADARACHE**

On 28 June 2005, the international community selected Cadarache (France) as the site for the experimental reactor on which scientists will attempt to recreate, on Earth, the conditions found in the Sun that are conducive to fusion reactions. The international partners involved – the European Union, Russia, China, the United States, Japan, South Korea and India – will

With a business plan

- An appointed project manager since 2005
- Member of the government driven « Comité industriel ITER>>
- Manager of an ITER dedicated international consortium
